

Introduction

Stedman EDI is your gateway to a more connected partnership. Start integrating your ERP system with ours to streamline processes and prepare for a more automated way of working.

Possibilities

The „Stedman GmbH’s“ EDI-procedure contains the following:

(**Send** / **Receive** <= seen from customer perspective)

The EDI-files are sent/received via FTP to/from the Stedman FTP-server.

Startup

What we need

If you plan to use our EDI interface, please ensure you have the following details available or request them if needed.

IP-Addresses for Firewall

We need the IP addresses of all systems that should be authorized to connect to the FTP server. => e.g. 192.x.x.x

What you receive

To use the EDI Interface, you receive the following information by the Stedman Customer Service / Marketing department.

FTP Credentials

IP-Address; URL; Username; Password; File path

Customer number (internal ERP no.)

The customer no. is needed to for placing the order.

Delivery address numbers (internal ERP no.)

In the EDI-procedure you can choose to enter the delivery address for each sales order or using a delivery address number

Articles with related barcodes

(EAN-13 format)
